SIL PROCUREMENT, SUPPLY CHAIN & INVENTORY

Getting started

For every user

User manual · 28 October 2026

Figures, limits and approval chains are the system defaults; your hospital may have changed them.

Contents

1. Signing in
2. Your account (*Administration → My account*)
3. The screen
4. Approving documents
    - In the app (*Approvals → My inbox*)
    - From an email
    - Rules you will meet
    - Delegation (*Approvals → Delegations*)
5. Statuses you will see
6. Getting help

Getting started (all users)

1. Signing in

1. Open the address your IT team gave you (for example `https://procure.yourhospital.org`).
2. Enter your **username** and **password** and press *Sign in*.
3. **First sign-in.** You must choose a new password before you can do anything else. The password policy (length, character types) is shown if your choice is refused.
4. **Two-factor sign-in (2FA).** If you turned it on, enter the 6-digit code from your authenticator app.

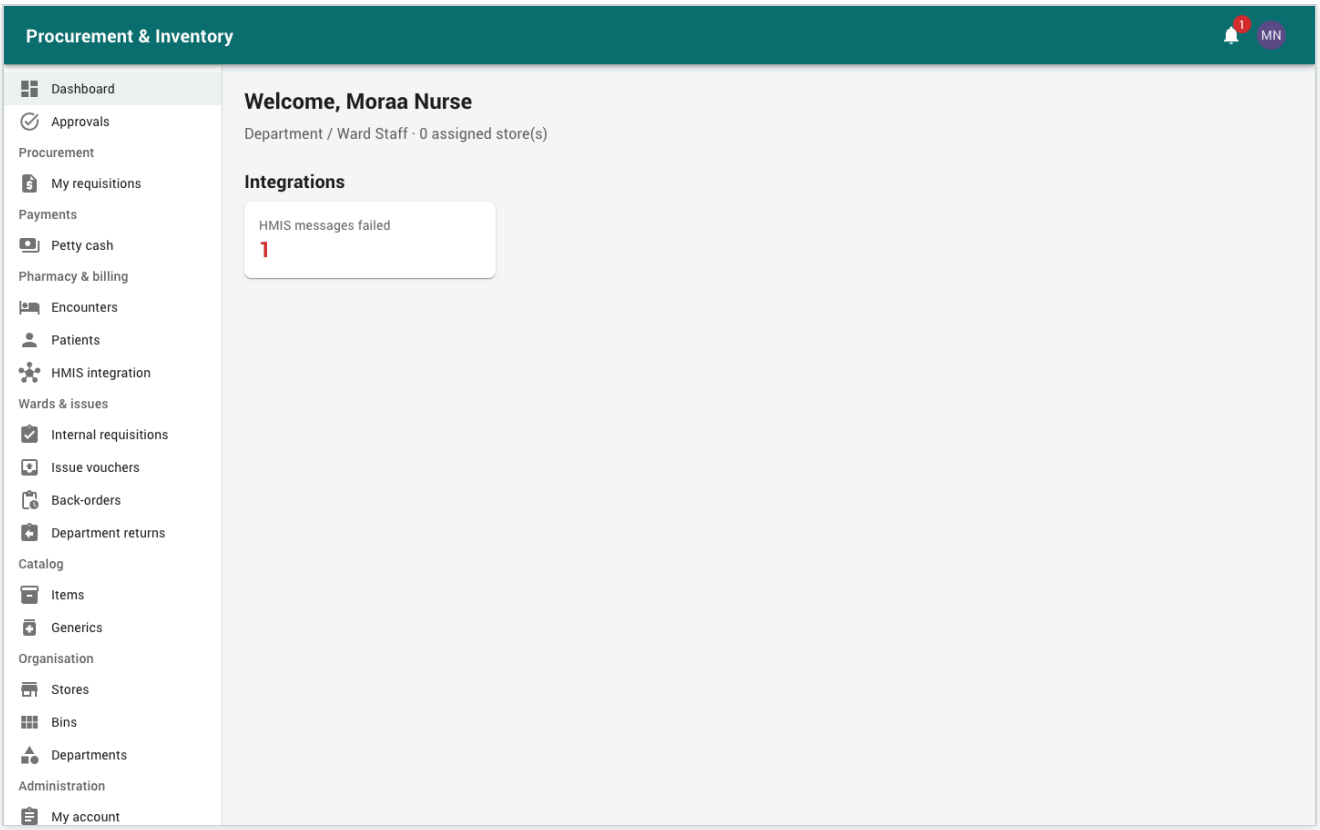

Things to know:

Message	Meaning	What to do
Invalid username or password	Wrong username or password	Try again carefully; usernames are lower case
Account temporarily locked. Try again later.	5 wrong passwords **or** 5 wrong 2FA codes	Wait 15 minutes, or ask the administrator
Too many invalid codes; sign in again	5 wrong 2FA codes on one sign-in	Enter your password again, then a fresh code
Too many requests	Too many sign-in attempts from your network in a minute	Wait a minute
You are signed out while working	30 minutes without activity, or 12 hours since sign-in	Sign in again; unsaved forms are lost

2. Your account (*Administration → My account*)

- **Change password**: enter the current password and the new one twice.
- **Two-factor authentication**: *Set up two-factor authentication* shows a QR code. Scan it with an authenticator app (Google Authenticator, Microsoft Authenticator, Authy), then enter the code shown to confirm. *Turn off* needs your password and a current code. **Finance, procurement and administrator users should turn it on.**
- **Notification preferences**: for each category (Approvals, Requisitions, Payments, Petty cash, stock alerts…) choose *In app*, *Email* or both.

3. The screen

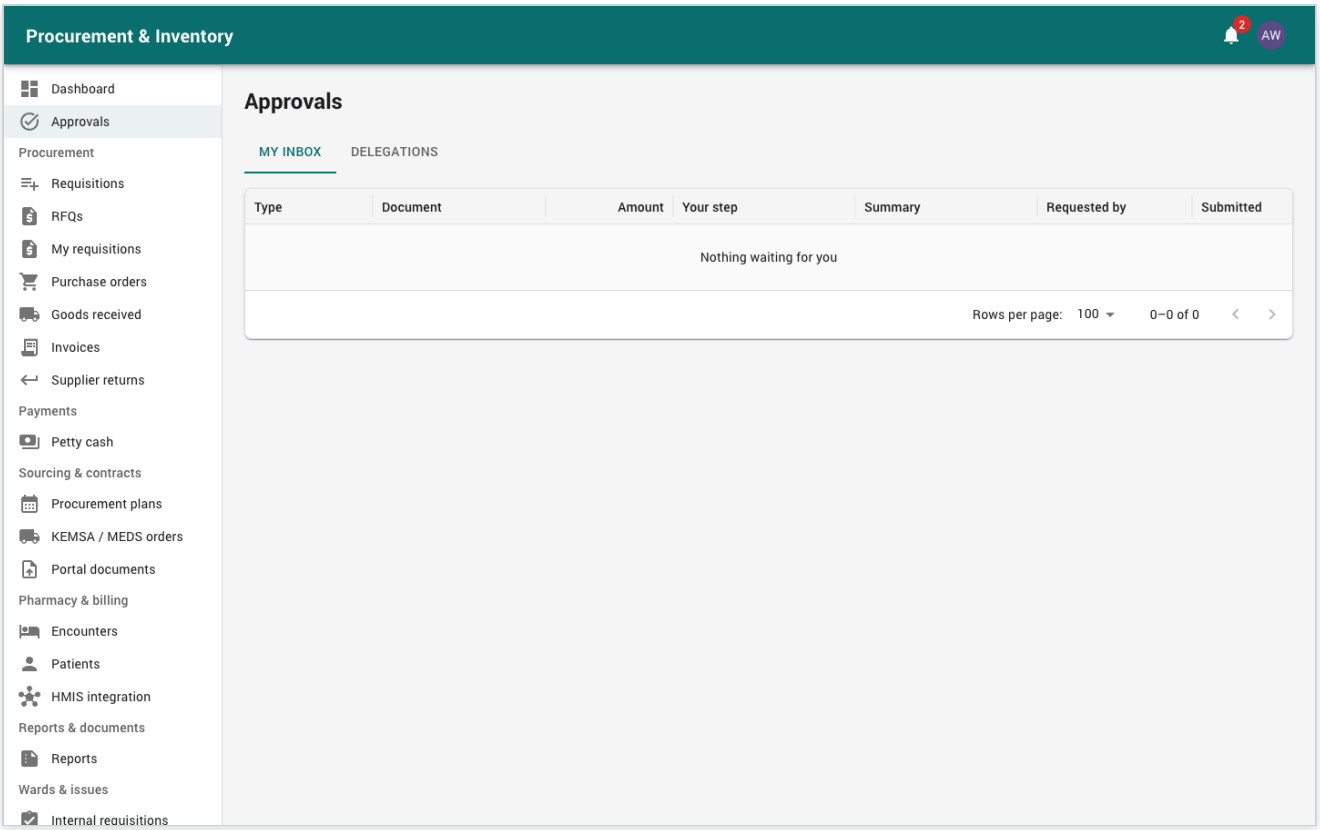

The home page and the left-hand menu (a ward nurse sees only what their role allows)

- **Left menu**, grouped by area (Procurement, Payments, Inventory…). You only see what your role allows. If you need a screen you can't see, ask the administrator to add the right role.
- **Dashboard** (home page) shows tiles for your work: approvals waiting, stock alerts, orders, invoices to pay, petty cash. Click a tile to open the list behind it.
- **Bell** (top right) shows notifications. It refreshes every 30 seconds.
- **Keyboard shortcuts**: `/` jumps to the search box of the page, `Alt+N` opens the *New* dialog, `Enter` submits a dialog and `Esc` closes it.
- **Document chain**: every document page (requisition, order, GRN, invoice, voucher…) shows the documents linked to it, before and after. Click any to open it.
- **PDF**: most documents have a *PDF* button. It prints them with their approval signatures.
- **Attachments**: drag files (PDF, JPEG, PNG) onto a document. Uploading a file with the same name adds a new version; old versions stay available.

4. Approving documents

Every document that needs approval (requisitions, orders, invoices, payment vouchers, petty cash, stock adjustments, disposals…) goes through the same approval engine.

In the app (*Approvals → My inbox*)

Approvals: My inbox, Delegations and Workflows

1. Open **Approvals**. *My inbox* lists everything waiting for you. Each row shows the document, amount, requester, the step and how long it has waited.
2. Open a document to check it. The chain, attachments and history are on the page.
3. Choose:
    - *Approve*;
    - *Reject* (a comment is required; the document stops);
    - *Return for amendment* (a comment is required; it goes back to the requester to change and resubmit).

From an email

Approval emails carry a personal link. It opens a page showing the document summary with *Approve*, *Reject* and *Return for amendment*, without signing in.

- The link works **once**, only for you and only for that step.
- It expires after **72 hours**. After that, use the app.
- If someone else has already acted on the step, the page says the approval *has moved on*.

Rules you will meet

- You can never approve something you requested or prepared.
- Each approval in a cycle must be by a different person.
- If you don't act in time, you may get a reminder, and the step may be **escalated** to another role, whose members can then act on it too.

Delegation (*Approvals → Delegations*)

Going on leave? Create a delegation: *Delegate to* a colleague, from and to dates, and a reason. During that time they can approve **on your behalf**; the history records "on behalf of". End it early from the same tab.

5. Statuses you will see

Status	Meaning
Draft	Being prepared; only the author sees and edits it
Pending approval / Submitted	In the approval chain
Approved	All approval steps done
Returned	Sent back for changes; edit and resubmit
Rejected	Stopped by an approver
Cancelled	Withdrawn
Closed	Finished

6. Getting help

- Something refused with a message in capitals (e.g. `OVER_LIMIT`, `ACCEPTANCE_REQUIRED`): the manual for your role explains the common ones.
- For access problems contact the **system administrator**. For approval limits and workflows, contact the **supply chain manager** or **finance manager**.
